IN THE CLAIMS

1. (currently amended) A kiosk for 3D display comprising:
a micro polarizer based 3D display system;
a ~~clear or transparent~~ band surrounding at least a portion of said display system;
one or more viewing polarized filters attached to or integral with said band; and
an ergonomic base unit supporting said display system and said band wherein multiple combinations of display systems with said bands to form a complete or partial ring of said 3D displays.
2. (original) The kiosk of claim 1 wherein said display comprises a CRT display.
3. (original) The kiosk of claim 1 wherein said display comprises an LCD display.
4. (original) The kiosk of claim 1 wherein said display comprises a projection screen upon which a 3D image is projected.
5. (original) The kiosk of claim 4 wherein said projected image is part of a front projection system.
6. (original) The kiosk of claim 4 wherein said display is part of a rear projection system.
7. (original) The kiosk of claim 1 further comprising sensors on or near said transparent band for sensing the presence of a viewer.
